DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 20 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In this case, claim 20 is directed towards "an image processing program." This claim 20 does not necessarily invoke "a computer readable storage medium" as required to meet 35 USC 101. An "image processing program" per se is considered as "functional descriptive material." Any such functional descriptive material must be embodied on a computer readable storage medium in order for it to be statutory. Since the instant claim does define any such medium, the claimed invention is not directed to statutory subject matter.

Allowable Subject Matter

3. Claims 1-19 and 21 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest claimed invention that of "inserting error resilience to respective code data of the rectangular portions prior to the entropy coding and setting intensities of the error resilience inserted to the respective code data for the error resilience inserting unit, so that the error resilience intensities are different according to base units of the respective code data" as recited in independent claims 1 and 21. Likewise, dependent claims 1-19 are also allowed for the same reasons as above.
